striking graphics along with engaging writing making big topics easy to understand

text book of biology part 1 vertebrata by h g herbert george wells in the year 1884 i was invited to give tuition by correspondence in biology although disposed at the time to ridicule the idea of imparting instruction in natural science by letter i gladly accepted the opportunity thus afforded me of ascertaining for myself what could and could not be accomplished in that direction anyone familiar with the scope of biological enquiry and the methods of biological instruction will not need to be reminded that it is only by the most rigorous employment of precise directions for observation that any good results are to be looked for at the hand of the elementary student true to this principle i determined to issue to my correspondence pupils rigid instructions and to demand in return faithful annotated drawings of facts observed in their usage in the case of two among the few students who passed through my hands the result far exceeded my most sanguine anticipations the notes sent in by one of them a man working at a distance alone and unaided far excelled those wrung from many a student placed under the most favourable surroundings and their promise for the future has been fulfilled to the utmost the individual in question being now a recognised investigator it thus became clear that not with standing the complex conditions of work in the biological field tuition by correspondence would suffice to awaken the latent abilities of a naturally qualified enquirer the average members of a university correspondence class will be found neither better nor worse than those of any other and they may therefore pass unnoticed if however the correspondence system of tuition may furnish the means of arousing a latent aptitude when the possibilities of other methods of approach are excluded and in so doing of elevating the individual to that position for which he was by nature qualified ensuring him the introduction to the one sphere of labour for which he was born it will have created its own defence and have merited the confidence of all right thinking people the plucking of one such brand from the burning is ample compensation for the energy expended on any number of average dullards who but require to be left alone to find their natural level we are delighted to publish this classic book as

part of our extensive classic library collection many of the books in our collection have been out of print for decades and therefore have not been accessible to the general public the aim of our publishing program is to facilitate rapid access to this vast reservoir of literature and our view is that this is a significant literary work which deserves to be brought back into print after many decades the contents of the vast majority of titles in the classic library have been scanned from the original works to ensure a high quality product each title has been meticulously hand curated by our staff our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work we hope that you will enjoy this wonderful classic work and that for you it becomes an enriching experience

the critical analysis of science textbooks is vital in improving teaching and learning at all levels in the subject and this volume sets out a range of academic perspectives on how that analysis should be done each chapter focuses on an aspect of science textbook appraisal with coverage of everything from theoretical and philosophical underpinnings methodological issues and conceptual frameworks for critical analysis to practical techniques for evaluation contributions from many of the most distinguished scholars in the field give this collection its sure footed contemporary relevance reflecting the international standards of unesco as well as leading research organizations such as the american association for the advancement of science whose project 2061 is an influential waypoint in developing protocols for textbook analysis thus the book shows how to gauge aspects of textbooks such as their treatment of controversial issues graphical depictions scientific historiography vocabulary usage accuracy and readability the content also covers broader social themes such as the portrayal of women and minorities despite newer more active pedagogies textbooks continue to have a strong presence in classrooms and to embody students socio historical inheritance in science despite their ubiquitous presence they have received relatively little on going empirical study it is imperative that we understand how textbooks influence science learning this book presents a welcome and much needed analysis tina a grotzer harvard

university cambridge massachusetts usa the present book provides a much needed survey of the current state of research into science textbooks and offers a widerange of perspectives to inform the science of writing better science textbooks keith s taber university of cambridge cambridge united kingdom
